modeFRONTIER
the multi-objective optimization and design environment

modeFRONTIER complementary European events

Be part and take on a challenge at the edge of technology

Our primary mission is to broaden our customers' knowledge in the modeFRONTIER Technology. It is for this reason that we are promoting the European modeFRONTIER Network.

Developed and produced by ES.TEC.O., modeFRONTIER is the world class software technology for PIDO - Process Integration and Multi Objective Design Optimization. PIDO is the new emerging approach to CAE and, more generally, to simulation-based engineering science which is revolutionizing the design process at all industrial levels.

In line with our principles and objectives to promote and disseminate the modeFRONTIER Technology, we organize and host Users' Meetings and Conferences that serve as forums for our European partners. All of these

events offer ideal platforms to exchange latest information, know-how and experiences with users, our experts and software developers.

The two complementary events that we present with this Flyer are designed as main meetings for all members to join and share opinions, projects, ideas and visions. Customers interested in widening their knowledge in modeFRONTIER, will have the opportunity to meet the people behind the technology.

Besides their highly qualified technical character dedicated to the exchange of experiences and circulating data on complementary CAE expertises, these events are designed as occasions for mutual understanding and collaboration towards innovation.

Meet us at these two complementary events and take on a challenge at the edge of technology!

Stefano Odorizzi
President EnginSoft SpA

1st modeFRONTIER Users' Meeting in Germany
2nd October 2007 – DCA, Stuttgart Airport Germany

Esteco GmbH cordially invites you to attend the 1st modeFRONTIER Users' Meeting.

Prof. Carlo Poloni, President and Luka Onesti, Software Development Manager of the ES.TEC.O. srl Trieste Headquarter, will present future visions and planned enhancements of the modeFRONTIER software.

The meeting agenda mainly covers and includes :

- Presentations by some invited speakers
- Presentations by modeFRONTIER users
- Presentation of modeFRONTIER 4 and software-development plans
- Discussions, requests, recommendations by users

modeFRONTIER Italian Users' Meeting 2007
within the EnginSoft CAE Users' Meeting
CAE Technologies for Industry
25th / 26th October 2007 – Stezzano (BG) Italy

EnginSoft S.p.A. cordially invites you to attend the annual CAE Users' Meeting and the modeFRONTIER Italian Users Meeting 2007.

The two days' agenda includes general sessions to analyse state-of-the-art and future perspectives of CAE and virtual prototyping tools as well as specific meetings dedicated to major CAE software. Special emphasis will be given to modeFRONTIER and its transversal compatibility that allows easy integration with most available CAE tools. Presentations of new enhancements and application cases will enrich the debate, stimulating users' discussions and opinion sharing.
